

Agenda

- Review Lecture 1/Day 1
- Important dates
- Complete Employee class
- toString method
- Lab 1

Important dates

- Last day to add, drop or withdraw to receive a refund for most programs/courses

June 01, 2020

- Last day to register for summer co-op work term

June 30, 2020

- Registration begins for fall co-op work terms

July 09, 2020

- Last day to withdraw from most programs / courses

July 15, 2020

Lab 1

- Create a class name “Car” think of it’s possible attributes and all possible methods.

Lab 1 Contd.,

- Create a class name “Car” with ‘toString’ method that displays values for all the instance variables using getters ,appropriately formatted in a table alike format “(hint: using \n).
- Create a constructor for the Car class that accepts values for the minimum variables mandatory to identify an individual car.(make , model, year, vinNumber)
- Create another constructor that accepts values for all the instance variables.

Variable to be
declared in Car
class

make

model

year

transmission

color

engine

vinNumber

price
