1) In the test class named "Assignment1" there are 8 tests to be performed.
2) Create a new project name 'Assignment1'
3) Create another class name" Account" and its subsequent methods according to the tester class (Assignment1).
4) In order to check your assignment completion runs the "Assignment1" class after each test.
5) Must use "IllegalArgumentException" instead of "System.out.println()".
6) Additional marks will be given for good coding practice for example:
    i) CamelCase for the all the variables and methods   ~ 2 marks
    ii) Using getter methods in the toString method   ~2 marks
    iii) Using descriptive variables names   ~3 marks
    iv) Reading and following the instructions precisely   ~3 marks

7) Deadline Tuesday June 17th, 2020.
